

Construction Site Storage **Cover-Tech™ Portable Containers** Safe, Accessible, Storage for Construction Companies

Portable storage containers make it easy to safely store expensive equipment on site. Storage containers protect valuable tools and make it easier for workers to access the equipment they need.

Available in lengths from 40 inches to 20 feet, all containers

are manufactured from heavy duty steel construction. When you purchase a container box, add your logo to the side of the container for highly visible advertising. Delivery is easy – simply load it on a flatbed with the built in forklift guides and its ready for the next job.

Features include:

- Lockbox and vandal bar
- Custom colours available
- Transport up to 8 high when flat packed
- Quick build feature allows for easy installation

Heavy duty fork lift pockets

Fully welded galvanized frame

Join units side to side or end to end using our connector kits to create a larger space

Our pin and clip assembly is easy, secure and quick. No tools required.

Flexible.

Containers can be used to store equipment on construction sites, for disaster relief, as pop-up stores or mobile offices – the possibilities are endless.

Customizable.

Containers can be modified to meet your specific requirements. Options range from adding a door or shelving system to changing the colour.

Stackable.

When folded flat, each container can be stacked eight high, saving on freight charges and warehouse space.

Portable.

Transportation of our containers is made easy with built-in forklift guides, lifting hooks, and optional wheel receivers.

UNIQUE QUICK BUILD DESIGN • ASSEMBLY IN MINUTES • NO TOOLS REQUIRED
